CAE - Speaking Part 2

Gendered Jobs

Below is a Venn diagram that shows the categories of professions. What categories do they represent? Can you think of any other professions that could be included in this diagram?

Do you agree with this division? Why (not)?

Consider reasons why women may be better or worse at working in:

construction
software engineering
law enforcement

Match the reasons below to the jobs in the pictures.

- Increased awareness of risks and safety
- Difficulty meeting physical fitness standards
- Higher risk of physical injury
- Excellence in crisis management and decision-making under pressure
- Demonstrated empathy and compassion
- Ability to diffuse tense situations and minimize the use of force
- Prioritization of user experience

In this part of the test, I'm going to give each of you three pictures. I'd like you to talk about two of them for about a minute, and also to answer a question briefly about your partner's pictures. Here are your pictures. They show women working typically male jobs. I'd like you to compare two of the pictures and say how women may be better than men in these positions and what problems they may face.

- How may women be better than men in the same positions?
- What obstacles may women face?

In this part of the test, I'm going to give each of you three pictures. I'd like you to talk about two of them for about a minute, and also to answer a question briefly about your partner's pictures. What job do you think may be the most challenging for women to do and why?

Consider reasons why men may be better or worse at working in:

primary school education
home health aide
dressmaking

Match the reasons below to the jobs in the pictures.

- Greater physical strength required in lifting and transferring clients.
- Better discipline and behaviour control.
- Lack of nurturing instinct.
- Limited understanding of female taste or style.
- Innovative problem-solving approaches leading to original designs.
- Excellence in technical skills and manual dexterity.

What job do you think may be the most challenging for men to do and why?

Answer the following questions related to gendered jobs.

1. Do you believe certain jobs are inherently better suited for men or women? Why (not)?
2. What factors contribute to the gender imbalance in certain professions?
3. How do societal expectations and stereotypes influence individuals' career choices based on gender?
4. Should employers strive for gender balance in their workforce?
5. Do gender-neutral job titles and descriptions are important for promoting diversity in the workforce? Why (not)?
